

# How to Connect to USA VPN

- In the search box type VPN and click on Cisco AnyConnect Secure Mobility Client

- The vpn client box should pop up showing USAHS Employee VPN ready for you to connect. If this box is blank, type in **vpn.usa.edu** and click on connect

- Enter in your USA login credentials(without @usa.edu) and click on ok to connect. If this is your first time connecting it will run a update. If it shows login failed, try restarting pc and connect again. Contact [support@usa.edu](mailto:support@usa.edu) if it continues to say login failed.
