How to Forget a WiFi Network on Windows 8.1 & Windows 10

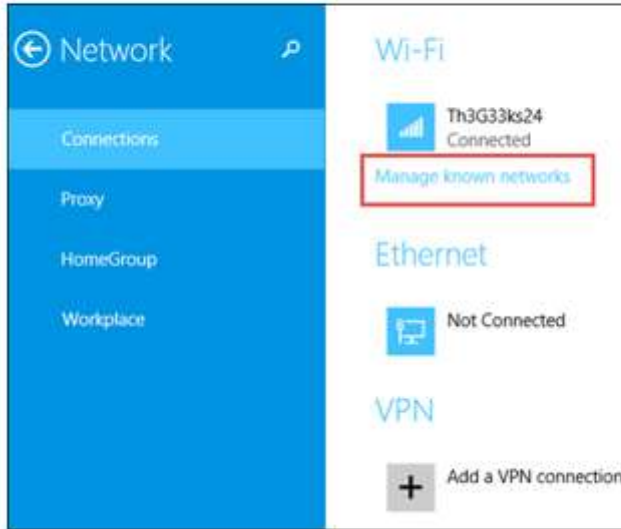

How do I forget a network on Windows 8.1 or Windows 10 in order to put in my new password?

Forget Network on Windows 8.1

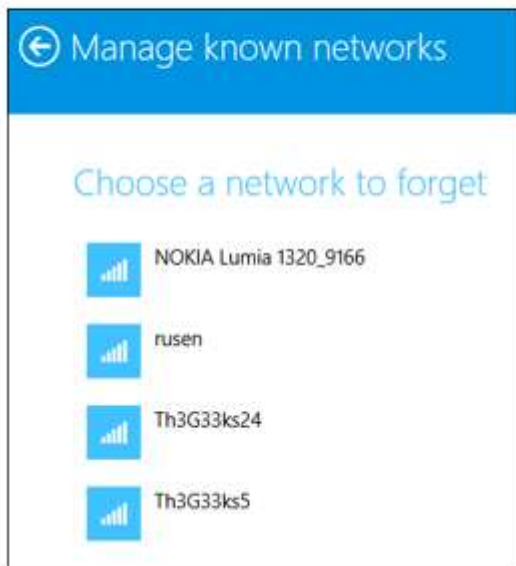

1. Open PC Settings and go to Network

- In the **Connections** section, look for **Wi-Fi** and the **Manage Known Networks** link. Click or tap on it.

- Windows 8.1 displays a list with the wireless networks for which it stores connection details.

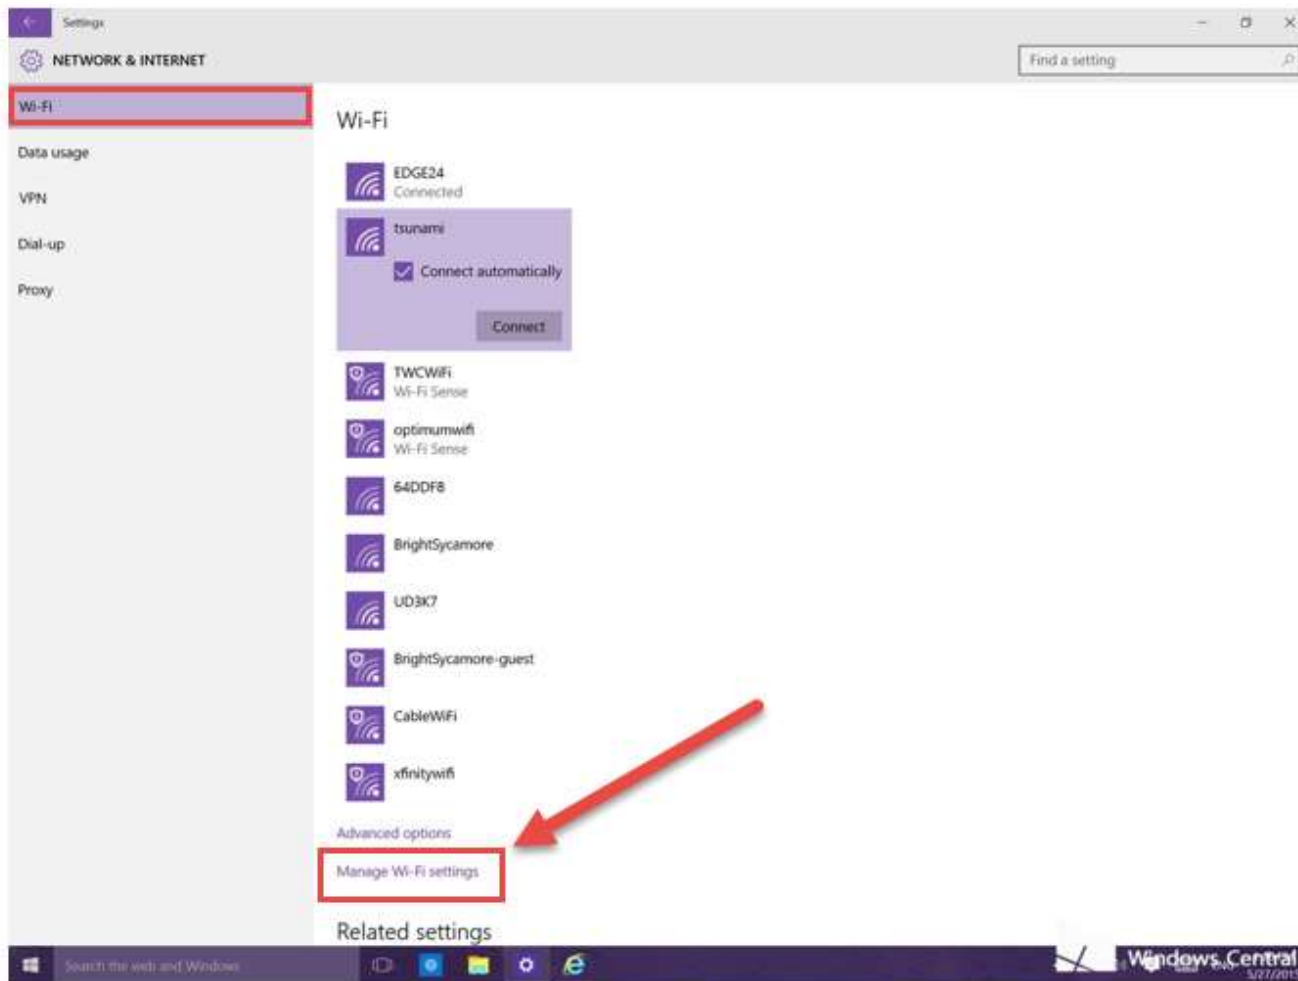

- Select the network you want to forget and press *Forget*.

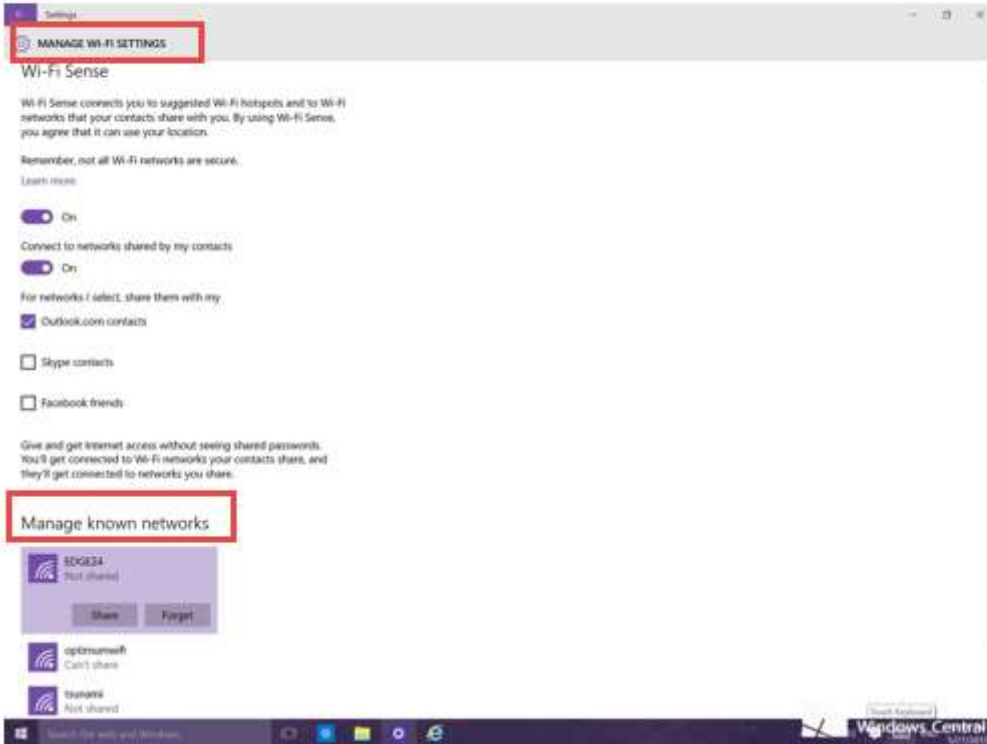

Forget Network Windows 10

1. On **Network & Internet** settings select **Wi-Fi**
2. From Wi-Fi select **Manage Wi-Fi settings**

3. From Manage Wi-Fi Settings look for the network you want to manage in **Manage Known Networks**.

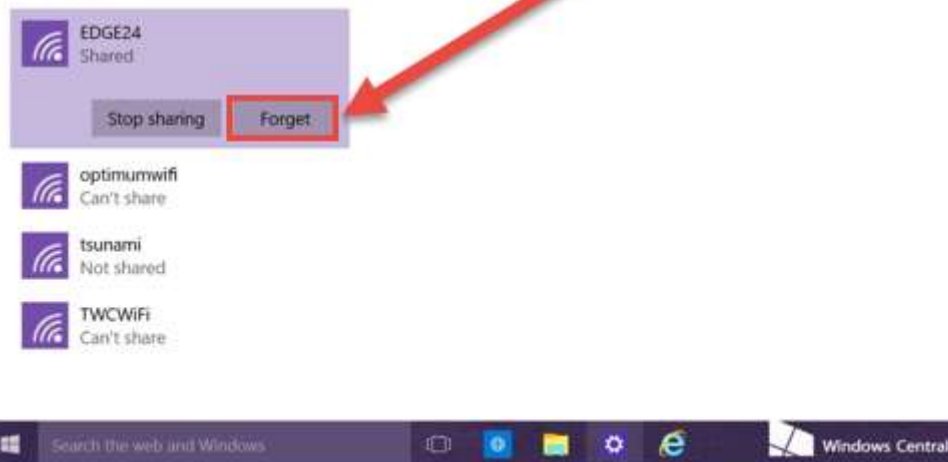

4. In Manage known networks, Click on **Forget** tab

Facebook friends

Give and get Internet access without seeing shared passwords. You'll get connected to Wi-Fi networks your contacts share, and they'll get connected to networks you share.

Manage known networks
